Dear John -

Hope all is going fine for you! Here I am keeping very busy. I feel I might have the outline in my head for the first book. They have been giving me instruction concerning the codes the Masters have played with mankind evolution throughout time here on Earth. I feel comfortable now about what I need to be doing in the future, it is just a matter of growing into it. I would like to talk to you soon concerning how it could best be set up to work with the formation, etc., and also I want to see about 2 other things.

One concerning something that has been developing for a time and I believe things have gone full circle and back to a point that means an idea

needs to be reconsidered. At one
time you considered developing
a research program with Dr. Amberg
and I feel you might want to
reconsider this. I have been doing
some hair Analysis with him
for some patients as an experiment
and we have had excellent results.
Because of this I feel something
might be done with the foundation
in Research on Anorexia, Alzheimer's
Disease, and Strokes. These areas
we have been dealing with and
had good results. It is possible
with Ari working with this
and developing it into a real
research program that the foundation
could come up with some answers
concerning these dreaded problems
of humanity. I have been working
with a young man here in Austin
who has directed me and given
me many medical directions
as well as in these areas and

somehow I hope we can work it out to be involved to aid in this way. John this could be the first step toward really getting the Medical Field to take note of Fitzer Foundation and its Medical Breakthrough in Research concerning health nutrition and a non surgical, non medicine, way of treatment.

Please reconsider this area and call me so we can pursue it further. Possibly the foundation could give a grant for the research or help him set up this research program with the foundation.

It really feels like we could be on to something here John so please give it some thought.

Also in March I am suppose to go to Egypt with John Davis and Joe Jackson. I had

mentioned before about possibly getting someone with a good video system to go over and record a program concerning the events as well as get down on tape what Jay has in knowledge concerning ancient Egypt. I believe it would be worth while and could be the start with your other videos on Tibetan Herbal Healing etc; of an educational Library which could be made available to the public. The John E. Fetzer Foundation
Lending Library on New Age Understanding

Sounds good, so think about this as well. These are 2 things which Michael has presented to me concerning what and where the foundation is headed. Sounds like maybe the energy is stabilizing now and going to begin producing real results.

Well that is about it for now
Hope to hear from you soon
so we can discuss these ideas.

Yr. Master
